

PENOBSCOT CLIMATE ACTION

August - October Update

Identification and Development of Toolkits

Over the last few months we have been hard at work developing actions for Penobscot Climate Action Toolkits.

The 10 toolkits will be made up of high priority and high impact actions recommended to address regional vulnerability areas and reduce greenhouse gas emissions. While more than 30 strategies will ultimately be recommended for consideration, the toolkits will give specific implementation resources to 10 strategies to kick-start action.

These toolkits were developed in cooperation with our project Advisory Committee and Working Groups. The Advisory Committee is responsible for overall project alignment with local needs and priorities. The Working Groups are responsible for informing toolkit details within one of five topic areas, including: housing, transportation, environment and quality of life, local economies and livelihoods, and health.

Toolkit Development Stages

AUGUST

Working Group Meeting #1

Identify priorities areas for each group's topic. Starting point: Preliminary List of Strategies

SEPTEMBER

Working Group Meeting #2

Narrow down a long list of ideas to 2-4 specific toolkit topics per group. 13 total. Starting Point: Points of Convergence

OCTOBER

Advisory Committee Meeting

Take the 13 recommendations from the 2nd working group meeting and further narrow that list to the final 10 toolkits. Starting Point: Proposed Toolkits

UPCOMING

Working Group Meeting #3

Goal: Outline specific details and resources for those 10 toolkits. Including specific projects, policies, or programs to support the action, key partnerships, etc.

Ideas generated through this process that don't become one of the 10 toolkits will be documented and recommended in the full summary report.
